ENT & Ophthalmic Drapes

Advanced Protection System
Innovation Focus: Barrier Performance

MULTIGATE®
At Multigate we combine our deep understanding of how you work with our design capabilities to innovate and better serve you, your patients and our partners.

For 30 years we’ve created medical products, services and experiences that give you the advantage to perform at your best. We continue to do this.

Inspiring performances and better patient outcomes that will lead the world of hospital care to new standards.

We are Multigate.
ADVANCED PROTECTION SYSTEM

We have combined over fifteen years of experience in drape development for the Australian perioperative market, with state of the art materials and manufacturing technologies, to bring you the latest in imperviousness and absorbency, delivering unbeatable patient and surgical team protection.

- Impervious
- High absorption capacity and speed
- Soft and pliable
- Strong and durable
- Low linting
- No latex
TECHNOLOGY — STATE OF THE ART MATERIALS TECHNOLOGY

Multigate Protex®4 Drapes utilise a pliable, yet tough impervious bi-laminate technology, supported by an additional generous ultra-reinforcement layer. They are designed to deliver maximum absorbency and strikethrough prevention and eliminate bacterial transfer.

FEATURES — SUPERIOR BARRIER PERFORMANCE

Superior Barrier Performance
Multigate Protex®4 drapes deliver impervious AAMI level 4 protection not just in the critical zone but across the entire drape.

High performance tethers.
Our tethers provide a strong heavy duty hold to manage quivers and leads with confidence.

Reliable adhesion.
Protex®4 drapes offer a reliable incise film and adhesion performance and are suitable for all skin types.

Fluid collection.
Fluid pouches made from polyethylene offer a durable heavy duty seal and are combined with strategically placed suction ports to aid the capture, monitoring and management of fluid and blood loss.
