

# MULTIGATE PrecisionPack®

## Packed with innovation

NEXT GENERATION CUSTOM PROCEDURE PACKS

# More than a pack, a partner in efficiency

**Efficiency, every time** — PrecisionPack® isn't just a procedure pack, it's a streamlined custom packing system, designed around your specific requirements to transform the way you prepare for surgery. Every pack is engineered to save time, optimise space, reduce waste and environmental impact, and support better workflow.

Addressing clinician concerns over bulk and complexity we have been able to reduce the bulk of the packs by up to 47%<sup>1</sup>, returning precious space to storeroom shelves.

### Space saving CubeWare®

Our rectilinear shaped CubeWare® 2.0 hollowware not only saves table space by up to 30%<sup>2</sup>, they also helps to reduce the bulk of packs by up to 47%<sup>1</sup>, so they are easier to store and handle.

### Improved shape & stability

CubeWare® 2.0 rectilinear design improves the shape and stability of packs allowing them to be stacked with more confidence. PrecisionPack®s can be securely placed on their back or side.

### Packing methodology

Combines with CubeWare® 2.0 to further improve the size, shape and stability of our packs and contributes to a more controlled un-pack during theatre setup, reducing the risk of items falling.

### Tailored to clinical needs

Customisable to match procedure-specific requirements and packed to ensure the right items are in the right order, every time.

### Front-facing label

Supports quick pack selection by making packs easier to locate on shelf and critical information easy to find. Each surgical specialty is represented by a different colour for easy identification.

### Future ready support

As new products emerge or requirements change, Multigate works with you to review, optimise, and reduce the environmental impact of your packs.

Front-facing labels make it easy to identify different packs on shelf

Supplied Climate neutral<sup>2</sup> to Australian customers

Improved pack structure CubeWare® 2.0 improves size, shape and stability of pack

Colour-coded labels represent each surgical specialty to help organise storerooms and facilitate quick pack selection

### EASY TO IDENTIFY AND STORE

### COLOUR CODED LABELS BY SPECIALTY

### PACKING METHODOLOGY IMPROVES UNPACK AND SETUP

## WHY CUSTOM PACK?

Custom Procedure Packs offer benefits across clinical, inventory and wider hospital performance.

## THEATRE PRODUCTIVITY IMPROVEMENTS

- ✓ Improved workflows which improve procedure times
- ✓ Reduced picking and setup times
- ✓ Improved aseptic practice
- ✓ Single use drives improved infection control
- ✓ Reductions in linen and associated lint
- ✓ Simplified surgeon preference management

## WIDER HOSPITAL PRODUCTION IMPROVEMENTS

- ✓ Reduced picking errors
- ✓ Reduced inventory holding costs of consumables
- ✓ Operating theatre space management
- ✓ Reduced CSSD costs
- ✓ Reduced procurement processing
- ✓ Less waste and less waste handling

## WHY PARTNER WITH MULTIGATE?

Multigate is a leading supplier of procedure packs and medical consumables in Australia. Combining local production in our world class clean room with a range of overseas joint ventures means we control the supply change for the vast majority of the components that go into your PrecisionPack®.

As new products become available or requirements change, we will work with you to optimise your packs for clinical performance, environmental impact and value.

As part of our commitment to better product stewardship, PrecisionPack® sold to Australian customers are supplied climate neutral<sup>3</sup> packs.

Disclaimers: 1. Based on internal testing which compared a custom procedure pack containing traditional hollowware vs same pack with CubeWare® hollowware. 2. Based on internal test which compared the area taken up of an equivalent range of Multigate traditional vs CubeWare® 2.0 hollowware. 3. Multigate purchases carbon credits via Carbon Neutral in approved, registered projects which have been independently assessed and verified as creating additional resources that help combat climate change using avoidance or sequestration means.
