Personal Protection Equipment

Surgical Face Mask (Level 2)

DESCRIPTION

Surgical masks, also known as medical procedure masks, are used to prevent large droplets of bodily fluids that may contain viruses or bacteria from escaping the wearer's nose and mouth. It helps to reduce the chance of spreading infectious airborne viruses and bacteria to others. It may also help block large droplets, splashes, sprays or splatter that may contain viruses and bacteria from others, keeping it from reaching the wearer's nose and mouth.
