

MULTIGATE™

IV Starter Packs

Enhancing performance at every step

Our IV Starter Packs and support services deliver an efficient, managed process designed to enhance performance at every step.

SERVICE

User Education

Managing sterile protocols across infrequent or expert users is paramount. All our clients have access to an intensive in-service education and training support program to ensure sterile protocols, patient comfort and product performance are maximised when using our IV Starter Packs.

DESIGN

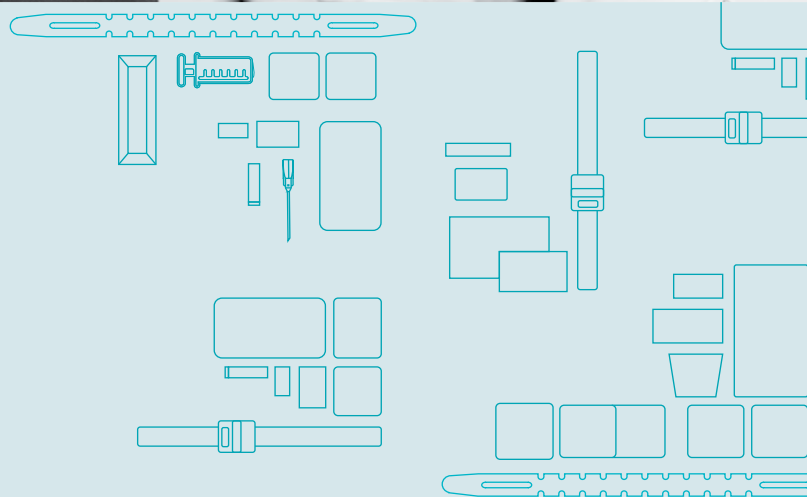

Time Saving

Our peripheral, mid-line and central access packs are customised to assist in optimising sterile protocols and personal protection for clinicians.

- 37-082 St IV Starter Pack

FEATURES

Patient Safety & Comfort

Our packs and in service support are designed to balance your needs for both patient safety and comfort.

Contamination Management

A single procedure pack significantly reduces the risk of contamination from that posed by multiple separately packed consumables.

Waste Minimising

Procedure packing delivers standardised and compliant practice and optimises the use of components for any given procedure.
