MULTIGATE SmartTab® Dressing Packs

Keeping tabs on infection.

Powered by the SmartTab[®] Aseptic Field, Multigate Dressing Packs have been assessed by the Association for Safe Aseptic Practice as the first in Australia to officially support ANTT[®] (Aseptic Non Touch Technique).

INNOVATION

Supporting aseptic practice.

SmartTab[®] Dressing Packs help to protect Key-Parts and Key-Sites in any procedure.

- Pack folding supports a safe and efficient opening
- Tabs provide a simple and effective way to open and position the Critical Aseptic Field
- ✓ Two-colour system clearly denotes aseptic surfaces

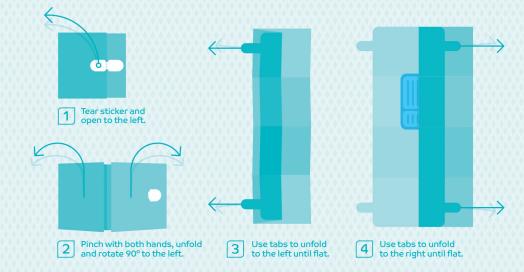

DESIGN

Improved process.

SmartTab® Dressing Packs support an easy four-step preparation of the Aseptic Field that helps caregivers to consistently follow ANTT® principles.

Visit: multigate.com.au/smarttab

FEATURES

Confidence.

Our forceps are designed to prevent lateral movement of the arms, preventing anything clamped from slipping free.

Security.

Packs are folded and secured with a tear-open sticker, reducing the risk of unintentional unravelling of the Pack.

Resources.

Formal ANTT® compliance better connects our customers to best practice resources prepared by The Association for Safe Aseptic Practice.

* KEY-PARTS

Key-Parts are those parts of the equipment that come into contact with any open wounds, insertion and puncture sites, liquid infusion or with other active Key-Parts connected to the patient via a medical device.

Flared sides are designed to provide stability. •.

Sloping grid aids the removal of excess fluid.

High walls minimise chance of spills and accommodate generous fluid volumes. :
