SafePro® 40

SURGICAL GOWNS

Protection and Comfort.

SafePro® 40 surgical gowns offer superior protection and comfort. Their 4-layer polypropylene construction delivers an excellent fluid and microbial barrier. The lightweight comfortable fabric is perfect for instrument nurses, assistants and surgeons.

TECHNOLOGY

Protection.

SafePro® 40 gowns are manufactured with a high quality four-layer SMMS fabric that delivers a high-performance splash resistant barrier that repels fluids and bacteria.

FEATURES

Comfort.

The SafePro® 40 fabric is low linting, easily draped. Generous sleeve sizes and a range of lengths ensure the SafePro® 40 range is designed with your comfort in mind.

AAMI level 3 protection.

SafePro® 40 standard and reinforced gowns meet and exceed AAMI level 3 standards making them the ideal solution for procedures involving light to moderate fluid levels.

Reinforced.

SafePro® 40 reinforced gowns feature a strong, yet breathable extra layer of reinforcement in the critical arm and front areas for added protection against fluid strikethrough.

- ✓ Comfortable
- ✓ Breathable
- ✓ Splash resistant barrier
- ✓ AAMI level 3 protection
- ✓ Reinforced critical areas
- ✓ Low linting

Microbial barrier that delivers improved barrier performance
