SmartTab® Dressing Pack

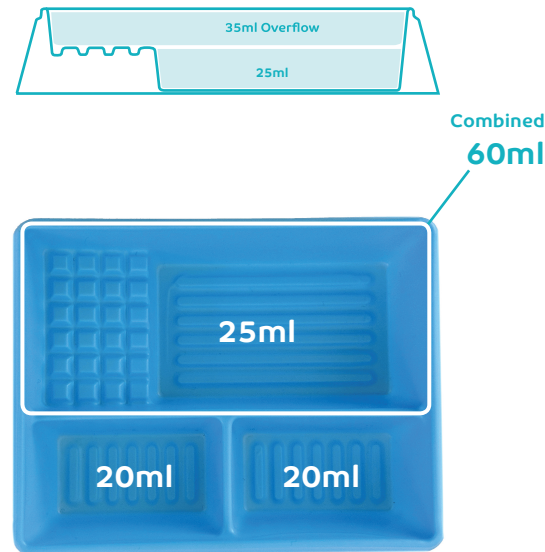

SmartTab® Dressing Pack Trays

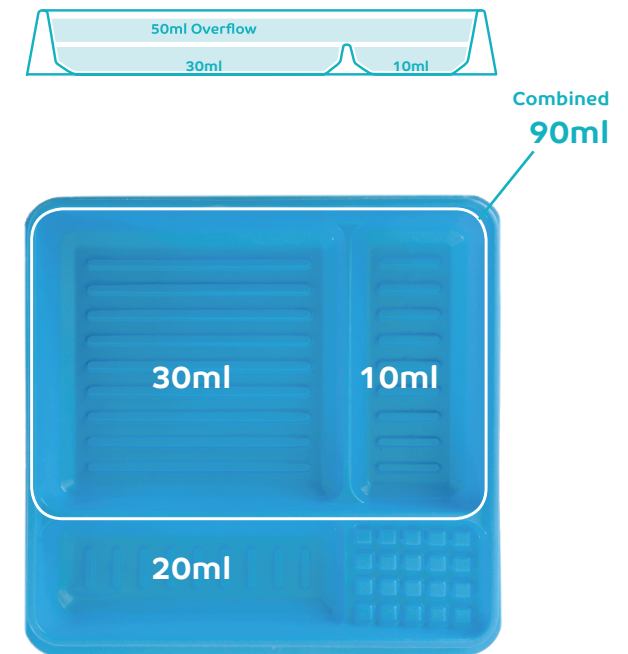

There are two trays used in our ANTT® certified dressing packs.

Both trays feature a three compartment design to offer users a variety of different shapes and volumes to choose from that best match their requirements.

Further, at least one compartment has been designed to incorporate an overflow feature, allowing for a significantly larger volume of liquid to be contained should it be required. The amount of volume this area can hold is referred to as the combined volume.
