

Ultra-thin Dressing

Improving dressing securement.

Addressing nurses concerns over poorly secured cannulas, we designed the Ultra-thin range of IV dressings to improve securement and the patient experience.

DESIGN

Strong but gentle.

Our Ultra-thin dressings combine a reinforced border with a strong but gentle adhesive to enhance cannula securement whilst still allowing for easy removal without compromising fragile skin.

A carefully designed range of shapes and sizes ensures our Ultra-thin dressings are designed to fit all your IV dressing needs.

Ultra-thin Dressings

- ✓ Gentle on fragile skin
- ✓ Easy cannula site observation
- ✓ Easy to apply

FEATURES

Improved Securement.

With their reinforced border technology and strong but gentle adhesive, our Ultra-thin dressings deliver improved cannula stabilisation.

Three sterile strips further enhance stabilisation and allow for the anchoring of cannulas and lines.

Maximising wear time.

The gentle adhesive is designed not to irritate, allowing for wear time to be maximised.

Maintains Skin Integrity.

The Ultra-thin dressing range utilises a strong but gentle adhesive, allowing it to be easily removed without compromising fragile skin.

Patient Comfort.

The Ultra-thin film is breathable, flexible and contours to the body enhancing patient comfort and movement.
